## **Three Phase Service**

### **Small Commercial Service**

#### **AVAILABILITY**

Service under this schedule is available at points on the Cooperative's interconnected system where existing facilities of adequate capacity and three phase voltage and the desired voltage are adjacent to the premises to be served.

#### **APPLICABILITY**

Service under this schedule is applicable to electric service to a member at one point of delivery measured through one meter. This schedule is applicable to members with monthly demands less than 30 kilowatts (kW) for the prior 12-month period which includes and ends with the current billing period.

#### **TYPE OF SERVICE**

The type of service provided under this schedule is three phase, at the standard voltage available for the premises to be served, supplied through one meter at one point of delivery.

#### **BILLING DEMAND**

The Billing Demand is the average kW supplied during the 15-consecutive-minute period at maximum use during the billing period, adjusted for Power Factor.

#### **POWER FACTOR**

Where the member's Power Factor is less than 97%, as determined by measurement under actual load conditions, the Cooperative may adjust the kW measured to determine the billing demand by multiplying the measured kW by 97% and dividing by the actual Power Factor.

#### **PHASE PROTECTION**

The Cooperative will not be responsible for damage to member's equipment caused by the loss of one or more phases serving member's equipment. It is the member's responsibility to obtain and install adequate phase protection for all three phase motors.
